PROFILE SUMMARY

AI/ML Engineer with a B.Tech in Computer Science & Engineering (AI & ML), skilled in Python, Scikit-learn, TensorFlow/Keras, NLP, deep learning, and REST API development. I have developed hand on experience in model building, training, feature engineering and deploying ML solutions using Flask, FastAPI, and Django. Built end-to-end projects spanning time-series forecasting, NLP, speech processing, and healthcare.

TECHNICAL SKILLS

Programming: Python, Java, C, C++, SQL

Machine Learning: Scikit-learn, Regression, Classification, Feature Engineering, Hyperparameter Tuning, Clustering

Deep Learning: TensorFlow, Keras, ANN, CNN, RNN, LSTM

NLP & Speech: NLP, Text Preprocessing, ASR, Text-to-Speech

Data Science: Pandas, NumPy, Matplotlib, EDA, Statistical Analysis

Backend & APIs: FastAPI, Flask, Django, REST APIs

Databases: MySQL, Oracle, JDBC

Tools: Git, GitHub, VS Code, PyCharm, Colab, Anaconda

AI/ML PROJECTS

Multilingual AI Video Voice Translation

Python · NLP · Whisper ASR · Google Translation · XTTS/Edge-TTS · Flask REST API | GitHub: [AI-Video-Voice-Translation](#)

- Built an end-to-end pipeline converting speech in audio/video to translated, synthesized speech (ASR → translation → TTS) served via a Flask REST API.
- Evaluated the pipeline across 6 languages with 105/105 successful test cases on a 22-segment evaluation set, with 19.7s end-to-end latency for a 2.4-minute video.

Stock Price Forecasting using Linear Regression & LSTM

Python · Pandas · Scikit-learn · TensorFlow/Keras · LSTM · Django | GitHub: [Stock-Price-Prediction-System](#)

- Built a time-series forecasting web app comparing a Linear Regression baseline to an LSTM (60-day sequence length, 16 features, early stopping). Linear Regression achieved up to 98.6% R² with 0.68% MAPE across AAPL, MSFT, and GOOGL, outperforming the LSTM model.
- Engineered sliding-window preprocessing on a 37.8MB multi-ticker dataset; integrated into a Django app with user-selected forecast horizons.

Heart Disease Prediction System

Python · Scikit-learn · Logistic Regression · Decision Tree · Random Forest · Django | GitHub: [Heart-Disease-Prediction-System](#)

- Built a Django web application for heart disease risk prediction using a supervised ML pipeline trained on a 13-feature clinical dataset. Evaluated 7+ classification models, using Accuracy, Precision, Recall, F1 and ROC-AUC.
- Applied feature scaling and hyperparameter tuning to improve model performance, prioritizing Recall and ROC-AUC for clinical risk assessment.

EXPERIENCE

AI & Machine Learning Intern — Alpha IT Consultants Pvt. Ltd., Mohali

Jan 2026 – Jun 2026

- Owned the ML lifecycle — requirements analysis, data preparation, model selection, evaluation, and code review — across client-facing use cases spanning speech, healthcare, and real-estate domains.
- Built and deployed 3 end-to-end AI applications (multilingual voice translation, breast cancer prediction, house price prediction), integrating ML models with REST APIs and Streamlit for end-user access.
- Collaborated with seniors in ideation sessions to streamline and improve process workflows across multiple projects.

EDUCATION

B. Tech, CSE (AI & Machine learning) — Maharaja Ranjit Singh Punjab Technical University, Bathinda

2022 – 2026

CGPA: 9.41 / 10

LEADERSHIP & CERTIFICATIONS

- Coordinator — Coders' Club, MRSPTU: organized workshops and coding competitions for 100+ students; mentored peers in C and data structures.
- Machine Learning with Python — Tech Hub Bathinda (2025) | Core Java (J2SE 21) — Tech Hub Bathinda (2024)
